

2. (Currently Amended) The resin molded article according to claim 1, wherein said three dimensional structure has voids providing each portions of low and high bulk densities.

3. (Previously Presented) The resin molded article according to claim 1, a mixture ratio of said polyolefin resin to said vinyl acetate resin or said ethylene vinyl acetate copolymer is 70 to 97 wt% to 3 to 30 wt%.

4. (Previously Presented) The resin molded article according to claim 2, a mixture ratio of said polyolefin resin to said vinyl acetate resin or said ethylene vinyl acetate copolymer is 70 to 97 wt% to 3 to 30 wt%.

5. (Previously Presented) The resin molded article according to claim 1, a mixture ratio of said polyolefin resin to said vinyl acetate resin or said ethylene vinyl acetate copolymer is 80 to 90 wt% to 10 to 20 wt%.

6. (Previously Presented) The resin molded article according to claim 2, a mixture ratio of said polyolefin resin to said vinyl acetate resin or said ethylene vinyl acetate copolymer is 80 to 90 wt% to 10 to 20 wt%.

7. (Previously Presented) The resin molded article according to claim 1, wherein a mixture ratio of said polyolefin resin to said styrene butadiene styrene is 50 to 97 wt% to 3 to 50 wt%.

8. (Previously Presented) The resin molded article according to claim 2, wherein a mixture ratio of said polyolefin resin to said styrene butadiene styrene is 50 to 97 wt% to 3 to 50 wt%.

9. (Cancelled)

10. (Previously Presented) The resin molded article according to claim 1, wherein a mixture ratio of said polyolefin resin to said styrene butadiene styrene is 70 to 90 wt% to 10 to 30 wt%.

11. (Previously Presented) The resin molded article according to claim 2, wherein a mixture ratio of said polyolefin resin to said styrene butadiene styrene is 70 to 90 wt% to 10 to 30 wt%.

12. (Cancelled)

13. (Previously Presented) The resin molded article according to claim 1, wherein said solid continuous filaments and/or short filaments have a diameter of 0.3 mm to 3.0 mm, and said hollow continuous filaments have a diameter of 1.0 mm to 3.0 mm.

14. (Previously Presented) The resin molded article according to claim 2, wherein said solid continuous filaments and/or short filaments have a diameter of 0.3 mm to 3.0 mm, and said hollow continuous filaments have a diameter of 1.0 mm to 3.0 mm.

15. (Previously Presented) The resin molded article according to claim 1, wherein said solid continuous filaments and/or short filaments have a diameter of 0.7 to 1.0 mm, and said hollow continuous filaments have a diameter of 1.5 mm to 2.0 mm.

16. (Previously Presented) The resin molded article according to claim 2, wherein said solid continuous filaments and/or short filaments have a diameter of 0.7 to 1.0 mm, and said hollow continuous filaments have a diameter of 1.5 mm to 2.0 mm.

17. (Original) The resin molded article according to claim 1, wherein said three-dimensional structure has a bulk density of 0.001 to 0.08 g/m<sup>3</sup>.

18. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure has a bulk density of 0.001 to 0.08 g/cm<sup>3</sup>.

19. (Original) The resin molded article according to claim 3, wherein said three-dimensional structure has a bulk density of 0.001 to 0.008 g/cm<sup>3</sup>.

20. (Original) The resin molded article according to claim 4, wherein said three-dimensional structure has a bulk density of 0.001 to 0.008 g/cm<sup>3</sup>.

21. (Original) The resin molded article according to claim 5, wherein said three-dimensional structure has a bulk density of 0.001 to 0.008 g/cm<sup>3</sup>.

22. (Original) The resin molded article according to claim 1, wherein said three-dimensional structure has a bulk density of 0.002 to 0.06 g/cm<sup>3</sup>.

23. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure has a bulk density of 0.002 to 0.06 g/cm<sup>3</sup>.

24. (Original) The resin molded article according to claim 3, wherein said three-dimensional structure has a bulk density of 0.002 to 0.06 g/cm<sup>3</sup>.

25. (Original) The resin molded article according to claim 4, wherein said three-dimensional structure has a bulk density of 0.002 to 0.06 g/cm<sup>3</sup>.

26. (Original) The resin molded article according to claim 5, wherein said three-dimensional structure has a bulk density of 0.002 to 0.06 g/cm<sup>3</sup>.

27. (Original) The resin molded article according to claim 1, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

28. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

29. (Original) The resin molded article according to claim 3, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

30. (Original) The resin molded article according to claim 4, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

31. (Original) The resin molded article according to claim 5, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

32. (Original) The resin molded article according to claim 6, wherein said three-dimensional structure is a cushion material for seats of an automotive vehicle or a bed.

33. (Cancelled)

34. (Original) The resin molded article according to claim 1, wherein said three-dimensional structure has a bulk density of 0.005 to 0.003 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.03 to 0.008 g/cm<sup>3</sup> at high density portions.

35. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure has a bulk density of 0.005 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.003 to 0.0083 at high density portions.

36. (Original) The resin molded article according to claim 3, wherein said three-dimensional structure has a bulk density of

0.005 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.003 to 0.0083 at high density portions.

37. (Original) The resin molded article according to claim 4, wherein said three-dimensional structure has a bulk density of 0.005 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.003 to 0.0083 at high density portions.

38. (Original) The resin molded article according to claim 5, wherein said three-dimensional structure has a bulk density of 0.005 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.003 to 0.0083 at high density portions.

39. (Original) The resin molded article according to claim 6, wherein said three-dimensional structure has a bulk density of 0.005 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.003 to 0.0083 at high density portions.

40. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure has a bulk density of 0.008 to 0.03 g/cm<sup>3</sup> at low density portions, and a bulk density of 0.004 to 0.007 g/cm<sup>3</sup> at high density portions.

41. (Original) the resin molded article according to claim 3, wherein said three-dimensional structure ha a bulk density of 0.008 to 0.003 g/cm<sup>3</sup> at low density portions and a bulk density of 0.004 to 0.07 g/cm<sup>3</sup> at high density portions.

42. (Original) the resin molded article according to claim 4, wherein said three-dimensional structure ha a bulk density of

0.008 to 0.003 g/cm<sup>3</sup> at low density portions and a bulk density of 0.004 to 0.07 g/cm<sup>3</sup> at high density portions.

43. (Original) the resin molded article according to claim 5, wherein said three-dimensional structure has a bulk density of 0.008 to 0.003 g/cm<sup>3</sup> at low density portions and a bulk density of 0.004 to 0.07 g/cm<sup>3</sup> at high density portions.

44. (Original) The resin molded article according to claim 1, wherein said three-dimensional structure has a bulk density of 0.001 to 0.03 g/cm<sup>3</sup> at a low density portions, and a bulk density of 0.005 to 0.006 g/cm<sup>3</sup> at high density portions.

45. (Original) The resin molded article according to claim 2, wherein said three-dimensional structure has a bulk density of 0.001 to 0.03 g/cm<sup>3</sup> at a low density portions, and a bulk density of 0.005 to 0.006 g/cm<sup>3</sup> at high density portions.

46. (Original) The resin molded article according to claim 3, wherein said three-dimensional structure has a bulk density of 0.001 to 0.03 g/cm<sup>3</sup> at a low density portions, and a bulk density of 0.005 to 0.006 g/cm<sup>3</sup> at high density portions.

47. (Original) The resin molded article according to claim 4, wherein said three-dimensional structure has a bulk density of 0.001 to 0.03 g/cm<sup>3</sup> at a low density portions, and a bulk density of 0.005 to 0.006 g/cm<sup>3</sup> at high density portions.

48. (Original) The resin molded article according to claim 5, wherein said three-dimensional structure has a bulk density of

0.001 to 0.03 g/cm<sup>3</sup> at a low density portions, and a bulk density of 0.005 to 0.006 g/cm<sup>3</sup> at high density portions.

49. (Currently Amended) The resin molded article according to claim 9 3, wherein said three-dimensional structure has a void ratio of 96 to 99% at said low density portions, and a void ratio of 91 to 97 at said high density portions.

50. (Currently Amended) The resin molded article according to claim 9 3, wherein said three-dimensional structure has a void ratio of 97 to 99% at said low density portions, and a void ratio of preferably 92 to 96% at said high density portions.

51. (Currently Amended) The resin molded article according to claim 9 3, wherein said three-dimensional structure has a void ratio of 97 to 98% at said low density portions, and a void ratio of 93 to 94% at high density portions.

52. (Original) The resin molded article according to claim 1, wherein a mixture ratio of solid filaments to hollow filaments is 0 to 50 to 50 to 100.

53. (Original) The resin molded article according to claim 2, wherein a mixture ratio of solid filaments to hollow filaments is 0 to 50 to 50 to 100.

55. (Original) The resin molded article according to claim 4, wherein a mixture ratio of solid filaments to hollow filaments is 0 to 50 to 50 to 100.

56. (Original) The resin molded article according to claim 5, wherein a mixture ratio of solid filaments to hollow filaments is 0 to 50 to 50 to 100.

57. (Original) The resin molded article according to claim 1, wherein outer surfaces of said hollow filaments are covered with solid filaments.

58. (Original) The resin molded article according to claim 2, wherein outer surfaces of said hollow filaments are covered with solid filaments.

59. (Original) The resin molded article according to claim 3, wherein outer surfaces of said hollow filaments are covered with solid filaments.

60. (Original) The resin molded article according to claim 4, wherein outer surfaces of said hollow filaments are covered with solid filaments.

61. (Original) The resin molded article according to claim 5, wherein outer surfaces of said hollow filaments are covered with solid filaments.

62. (Previously Presented) The resin molded article according to claim 1, wherein a take off speed for taking off the extruded continuous filaments is changed to thereby form high density portions having an increased bulk density which each extend in a direction of width of said three-dimensional

structure and are ranged at predetermined space intervals and the direction of length of the three-dimensional structure.
